## - PRODUCT DATA SHEET -

**Name of Product:** Recombinant Human FBLN2 Protein  
**Catalog Number:** hRP-1100  
**Manufacturer:** LD Biopharma, Inc.

### Introduction

Human Fibulin-2 (FBLN2) gene encodes an extracellular matrix protein, which belongs to the fibulin family. This protein binds various extracellular ligands, such as fibronectin and calcium. It may play a role during organ development, in particular, during the differentiation of heart, skeletal and neuronal structures. Recent data also indicated that human FBLN2 has an important tumor-suppressive and anti-angiogenic role in nasopharyngeal carcinoma (NPC).

Full-length mature human FBLN2 cDNA (28–1184aa, isoforms-b, derived from BC051690) was constructed with codon optimization and expressed with a small T7-His-TEV cleavage site Tag (29aa) fusion at its N-terminal. This protein is expressed in E.coli as inclusion bodies. The final product was refolded using our unique “temperature shift inclusion body refolding” technology and chromatographically purified.

**Gene Symbol:** FBLN2  
**Accession Number:** NP\_001989.2  
**Species:** Human  
**Size:** 20 µg / Vial  
**Composition:** 0.2 mg/ml, sterile-filtered, in 20 mM pH 8.0 Tris-HCl Buffer, with proprietary formulation of NaCl, KCl, EDTA, arginine, DTT and Glycerol.  
**Storage:** In Liquid. Keep at -80°C for long term storage. Product is stable at 4 °C for at least 30 days.

## Applications

1. May be used for in vitro human FBLN2 mediated early human ES cell differentiation regulation study or tumor-suppressor gene activities study with this protein as either coating matrix protein or soluble factor.
2. May be used for FBLN2 protein-protein interaction assay.
3. As antigen for specific antibody production.

## Quality Control

Purity: > 90% by SDS-PAGE.
